NANDHAKUMAR S

Python Developer | ML Engineer | AI & Data Science
Bengaluru, Karnataka, India
☎ +91 7010597980 | ✉ nandhakumar.s.jnandhu@gmail.com | LinkedIn | GitHub

SUMMARY

Recently graduated B.Tech in Artificial Intelligence and Data Science with hands-on experience in Python, Machine Learning, and AI-powered automation. Proficient in supervised learning, model evaluation, feature engineering, and data preprocessing. Experienced with Generative AI tools including ChatGPT, Claude AI, and Google Gemini. Skilled in Prompt Engineering and workflow automation using n8n. Seeking an entry-level role in ML Engineering, Data Science, AI Development, or Python Development.

SKILLS

- Languages & ML: Python, Machine Learning, Deep Learning, Supervised Learning, Classification, Regression, NLP
- Libraries: Pandas, NumPy, Matplotlib, Scikit-learn, PyWhatKit, TensorFlow
- AI Tools: ChatGPT, Claude AI, Google Gemini, Prompt Engineering, AI Content Creation
- Automation: n8n Workflow Automation, Email Automation
- Database: MySQL, Relational Database
- Tools & Platforms: Jupyter Notebook, Google Colab, VS Code, PyCharm, GitHub, REST API
- Concepts: Data Preprocessing, Feature Engineering, Model Evaluation, EDA, Statistical Analysis, Predictive Analytics
- Soft Skills: Analytical Thinking, Problem Solving, Team Collaboration, Time Management, Communication

PROJECTS

NammaPred – Bengaluru Metro Intelligence System GitHub Link

- Built an end-to-end ML pipeline for passenger count prediction and crowd level classification across Purple, Green, and Yellow BMRCL metro lines using Python, Scikit-learn, and XGBoost.
- Applied 6 ML algorithms; XGBoost Regressor achieved **R^2 score of 0.96** and Random Forest Classifier attained **89.79% accuracy**.

Fake Instagram Profile Detection using Machine Learning GitHub Link

- Built end-to-end ML classification pipeline: data preprocessing, feature engineering, model training and evaluation.
- Applied Logistic Regression achieving **94.9% accuracy**; analyzed followers/following ratio and profile completeness features.

CareHub – Smart Hospital Management & Billing System GitHub Link

- **Python & MySQL** based system to manage patient records, appointments, and automated billing with QR payment.
- Automated WhatsApp delivery via PyWhatKit reducing manual effort by ~80%; designed MySQL relational schema.

EDUCATION

- 2022 – 2026 **B.Tech in Artificial Intelligence and Data Science**
  Mahendra College of Engineering, Salem — CGPA: 7.20
- 2022 Class 12th, Saraswathi Matric Hr. Sec. School — 70.6%
- 2020 Class 10th, Saraswathi Matric Hr. Sec. School — 73.4%

INTERNSHIPS & TRAINING

Aug 2025 – Jun 2026 | **Machine Learning and Python Course – Livewire**

- Hands-on training in **Data Science, Machine Learning, feature engineering,** and **model evaluation**.
- Worked with **NumPy, Pandas, Matplotlib, Scikit-learn** and real-world datasets.

Aug 2024 – Sep 2024 | **Full Stack Intern – Crescent Infotech**

- Developed front-end and back-end components using **HTML, CSS, Python, and Flask basics**.
- Used **Git** for version control; gained web app deployment and code optimization experience.
